Jumbo toilet roll dispensers

Brightwell Dispensers offer five sizes of the Modular jumbo toilet roll dispenser. The integrated reversible spigot enables the use of different roll-core diameters which increase the amount of application possibilities.

Available with the small format only, the stub allows the addition of a second toilet roll when the first one has reached half of its original size. This feature helps reducing paper waste and keeping the cubicle neat and tidy.

The Modular jumbo toilet roll dispensers come with a blue window. However, a set of colored windows and branding options enable full product customization to match a company's brand. These features are available for the entire Modular range.

NEW

We are pleased to announce the launch of our new twin micro jumbo toilet roll dispenser as part of the growing Modular range of jumbo toilet roll dispensers.

Features

- Small jumbo with stub helps reduce paper waste
- Clever reversible spigot fits different roll-core diameters (click for image)
