

Wet wipe dispenser

Solid and clever, the Modular wet wipe dispenser has been designed to dispense one wet wipe at a time, while keeping the remaining stock as fresh as new. The automatic closure fits perfectly to the neck provided for wetwipe packs, preventing wipes from drying out. Mounted on a wall, this static cleaning station also keeps the workplace tidy and locks away the stock of wetwipes.

By default, the Modular wet wipe dispenser comes with a blue window. However, a set of coloured windows and branding options enable full product customisation to match a company's brand. These features are available for the entire Modular range.

High annual MOQs apply. Contact a member of the Brightwell Dispensers Inc Business Development team to discuss your business care.
